Bengaluru, India | alex.kumar@email.com | +91 98765 43210 | linkedin.com/in/alexkumar | github.com/alexkumar

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable distributed applications, REST APIs, and cloud-native systems. Experienced in full-stack development, microservices architecture, database optimization, and performance tuning. Skilled at delivering highly available applications with measurable business impact.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

Frameworks: React, Node.js, Express, Django, Flask

Databases: PostgreSQL, MongoDB, Firebase, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD, Linux, Git

Backend Concepts: REST APIs, Microservices, System Design, Unit Testing, Design Patterns

WORK EXPERIENCE

Software Developer

Infosys Ltd. | Bengaluru | June 2022 – Present

- Designed and deployed enterprise applications supporting 1,000+ users and improving resource allocation efficiency by 42%
- Developed high-performance REST APIs using Node.js and Express processing 20,000+ requests daily with 99.9% availability
- Optimized PostgreSQL queries and caching strategies, reducing response latency by 32%
- Migrated monolithic frontend architecture to React-based modular components reducing load times by 45%
- Implemented CI/CD workflows and automated testing pipelines reducing deployment effort by 50%

Junior Developer

TechServe Solutions | Hyderabad | Jan 2021 – May 2022

- Built customer portal architecture using Django and PostgreSQL supporting 3,000+ users
- Designed Python automation pipelines reducing manual processing workload by 55%
- Integrated payment systems and improved transaction success rate by 22%
- Resolved 200+ production bugs and improved platform reliability

PROJECTS

Personal Finance Tracker

- Designed and developed full-stack expense management platform using React and Firebase
- Implemented secure authentication, real-time synchronization, and budget threshold alerts
- Integrated dynamic visual analytics dashboard for spending trends
- Deployed application on Vercel with scalable frontend architecture

Movie Recommendation System

- Designed content-based recommendation engine using TF-IDF vectorization and cosine similarity
- Trained recommendation model on 5,000+ movie descriptions
- Developed Flask API endpoints for real-time recommendation generation

EDUCATION

Bachelor of Technology in Computer Science

VIT University | CGPA: 8.2/10

CERTIFICATIONS

- AWS Cloud Practitioner
- Google Data Analytics Professional Certificate
- HackerRank Python Gold Badge
