SUMMARY

Motivated Information Science undergraduate with hands-on experience in Artificial Intelligence, Machine Learning, and full-stack application development. Experienced in building AI-powered systems using NLP, explainable AI techniques such as LIME, and scalable backend solutions with Java and Spring Boot. Skilled in developing end-to-end applications, integrating machine learning models into real-world workflows, and designing data-driven solutions through collaborative project and internship experience.

EDUCATION

BNM Institute of Technology

Bachelor of Engineering in Information Science

Grade: 9.65 CGPA (5th semester)

Bengaluru

2023-Present

S.G.P.T.A PU College

Pre-University (PCMC)

Grade: 95.83 %

Bengaluru

2021-2023

Sri Kumaran Children's Home – CBSE

Grade 1 to 10

Grade: 92.4%

Bengaluru

2011-2021

SKILLS

Languages & Databases: Java, Python, SQL, JavaScript

Frontend: React, HTML, CSS

Backend & Databases: Spring Boot, REST APIs, PostgreSQL, Firebase

ML & AI: Machine Learning, NLP, Multi-task Learning, Prompt Engineering

Frameworks & Tools: PyTorch, Scikit-learn, LIME, Postman, Power BI, Jira, Docker

Core Concepts: Object-Oriented Design, Data Structures

Soft Skills: Team collaboration, Communication skills

INTERNSHIPS

UST

AI/ML Intern

Bengaluru

June 2025 – July 2025

- Designed and implemented a dual-head DistilBERT architecture for multitask classification of fake news and ideological bias, achieving 83.1% accuracy and F1-score on fake news detection.
- Improved bias detection with a 71.2% accuracy and F1-score, enabling robust identification of left, right, and unbiased narratives in news articles.
- Optimized multi-task learning pipeline with weighted loss functions and gradient optimization, attaining a combined H-score of 0.7671 and a micro-accuracy of 77.08%.
- Integrated LIME explainability layer to surface token-level rationales per prediction, improving model transparency.

PROJECTS

SmartSpend

Personal Finance and Subscription Intelligence Platform

Bengaluru

April 2026-May 2026

- Built a full-stack personal finance platform enabling users to track expenses, manage subscriptions, set monthly budgets, and receive AI-powered spending insights through interactive analytics dashboards.
- Designed a Dockerized microservice-based architecture using React, Spring Boot, Flask, PostgreSQL, implementing 12+ REST APIs, multi-user workflows, data persistence, and automated PDF/CSV report generation.
- Developed an ML-driven financial risk engine to identify spending anomalies, duplicate subscriptions, and recurring expense patterns, delivering personalized recommendations while optimizing dashboard load times to under 2 seconds.

JobFlow

AI Powered Resume Intelligence Platform

Bengaluru

March 2026-April 2026

- Built a full-stack AI-powered resume analysis platform that evaluates resumes against job descriptions, generates ATS scores, and provides personalized feedback with career-readiness insights.
- Designed and implemented an ATS evaluation engine with 5 scoring dimensions and 7 AI-driven analysis modules, leveraging Llama-based LLM for skill-gap detection, resume optimization suggestions, and personalized interview question generation.
- Implemented secure BCrypt-based authentication, session management, and user-specific history tracking while optimizing backend REST APIs to achieve 118-300 ms response times, enabling responsive dashboard insights and user history tracking.

ACHIEVEMENTS AND INVOLVEMENT

Samsung Innovation Campus

Student Trainee

Bengaluru

October 2025 – February 2026

- Completed a 360-hour industry led Machine Learning training program focused on building and optimizing real world AI solutions.
- Improved model performance by up to 20% through structured experimentation, feature engineering, and hyperparameter tuning.

Power BI Internship

Internal Internship

Bengaluru

July 2024 – August 2024

- Designed and developed 5+ interactive dashboards including sales analytics and content trend analysis using Power BI visualizations and data modeling techniques.
- Improved data interpretation and business decision-making by implementing dynamic filters, slicers, drill-through navigation, and real-time reporting features.
