SUMMARY

Motivated Information Science undergraduate with hands-on experience in Artificial Intelligence, Machine Learning, and application development. Skilled in explainable AI techniques such as LIME, model deployment, blockchain development and data analysis using Power BI. Proficient in Firebase database management and backend integration. Combines technical skills with collaborative teamwork, peer mentorship and meaningful contribution in a professional internship setting.

EDUCATION

BNM Institute of Technology Bachelor of Engineering in Information Science Grade: 9.65 CGPA (5 th semester)	Bengaluru 2023-Present
S.G.P.T.A PU College Pre-University (PCMC) Grade: 95.83 %	Bengaluru 2021-2023
Sri Kumaran Children's Home – CBSE Grade 1 to 10 Grade: 92.4%	Bengaluru 2011-2021

SKILLS

Languages & Databases: Java, Python, Firebase
ML & AI: Machine Learning, NLP, Multi-task Learning, Model Evaluation, Feature Engineering
Frameworks & Tools: PyTorch, Scikit-learn, Hugging Face Transformers, LIME, Power BI
Product & Collaboration Tools: Jira, Asana
Core Concepts: Object-Oriented Design, Data Structures, Algorithm Development
Soft Skills: Communication, Problem-Solving, Team Collaboration

INTERNSHIPS

UST AI/ML Intern	Bengaluru June 2025 – July 2025
- Designed and implemented a dual-head DistilBERT architecture for multitask classification of fake news and ideological bias, achieving 83.1% accuracy and F1-score on fake news detection. - Improved bias detection with a 71.2% accuracy and F1-score, enabling robust identification of left, right, and unbiased narratives in news articles. - Optimized multi-task learning pipeline with weighted loss functions and gradient optimization, attaining a combined H-score of 0.7671 and a micro-accuracy of 77.08%. - Integrated LIME explainability layer to surface token-level rationales per prediction, improving model transparency.	

PROJECTS

JobFlow AI Job Application Automation Platform	Bengaluru November 2025-January 2026
- Built a full-stack AI platform for automated resume tailoring and intelligent job application management. - Reduced manual resume customization effort by 60% through NLP-driven keyword extraction and dynamic content writing. - Implemented human-in-the-loop validation, automated email workflows, and managed 100+ application states using Firebase Firestore.	
SecureTrace Secure B2B Supply Chain Risk Analysis Dashboard	Bengaluru September 2025-October 2025
- Developed a blockchain-backed ML system for supplier risk prediction and anomaly detection in B2B supply chains. - Generated and validated 738 blocks using SHA-512 hashing and smart contract logic to ensure data integrity. - Implemented a Random Forest model and achieved an accuracy of 92% and applied Structural Equation Modelling to identify latent risk factors across 700+ transactions.	

ACHIEVEMENTS AND INVOLVEMENT

Samsung Innovation Campus Student Trainee	Bengaluru October 2025 – February 2026
- Completed a 360-hour industry led Machine Learning training program focused on building and optimizing real world AI solutions. - Improved model performance by up to 20% through structured experimentation, feature engineering, and hyperparameter tuning.	
Power BI Internship Internal Internship	Bengaluru July 2024 – August 2024
- Designed and developed interactive dashboards with real-time data sources using Power BI, including Azure Maps, slicers, and drill-through navigation. - Enhanced business insights through optimized DAX expressions and Power Query, reducing refresh latency by 25%.
