PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with 3.5 years of experience managing cloud infrastructure, CI/CD pipelines, and container orchestration. Proficient in AWS, Docker, Kubernetes, and infrastructure-as-code tools. Passionate about automation, reliability engineering, and reducing deployment friction for development teams.

TECHNICAL SKILLS

Cloud: AWS (EC2, ECS, Lambda, S3, RDS, CloudWatch, IAM), GCP (Compute, GKE), Azure basics

Containers: Docker, Kubernetes, Helm, Docker Compose

IaC: Terraform, AWS CloudFormation, Ansible

CI/CD: Jenkins, GitHub Actions, GitLab CI, ArgoCD

Monitoring: Prometheus, Grafana, ELK Stack, Datadog, PagerDuty

Languages: Python, Bash, Go (basics), YAML, HCL

Other: Linux (Ubuntu, CentOS), Nginx, HAProxy, Git, Jira

WORK EXPERIENCE

DevOps Engineer

Zoho Corporation | Chennai, India | August 2022 - Present

- Managed AWS infrastructure serving 500K+ daily active users across 3 production environments with 99.95% uptime SLA
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time from 45 minutes to 8 minutes
- Containerized 12 microservices with Docker and orchestrated them on a Kubernetes cluster (EKS) with auto-scaling policies
- Implemented infrastructure-as-code using Terraform, managing 200+ AWS resources across staging and production
- Set up centralized monitoring with Prometheus and Grafana, creating 40+ alert rules that reduced incident response time by 50%
- Led migration from monolithic deployment to blue-green deployment strategy, achieving zero-downtime releases

Systems Engineer

TCS (Tata Consultancy Services) | Bangalore, India | June 2021 - July 2022

- Administered Linux servers (Ubuntu/CentOS) for a banking client, managing patching, security updates, and user access
- Wrote Bash and Python scripts to automate log rotation, backup verification, and server health checks
- Configured Nginx reverse proxy and load balancer for a high-traffic web application
- Participated in on-call rotation handling P1/P2 incidents with root cause analysis documentation

PROJECTS

Self-Healing Infrastructure on AWS

Designed an auto-remediation system using CloudWatch Alarms, Lambda functions, and SNS to automatically restart failed EC2 instances and notify the team. Reduced manual intervention for common failures by 80%.

GitOps Deployment Pipeline

Implemented a GitOps workflow using ArgoCD and Helm charts for a Kubernetes-based application. Pull requests to the config repo automatically trigger staged rollouts with automatic rollback on health check failures.

EDUCATION

Bachelor of Engineering in Information Technology

Anna University, Chennai | 2017 - 2021 | CGPA: 8.0/10

CERTIFICATIONS

- AWS Solutions Architect Associate (2023)
- Certified Kubernetes Administrator - CKA (2023)
- HashiCorp Terraform Associate (2022)
- Red Hat Certified System Administrator - RHCSA (2021)
